

- ▶ Osmose can help reduce costs and avoid backlogs of poles requiring replacement

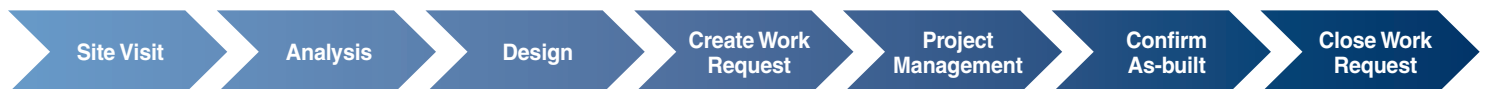

Pole Replacement Design Services

A follow-up to pole inspection & treatment

Osmose can provide professional grade technicians and designers armed with engineering tools designed to support the turnkey design of pole replacements. We customize the process to blend with your current work management systems and procedures for seamless workflow. Outsourcing pole replacement design to Osmose allows you to dedicate scarce engineering resources to mission critical and revenue generating work while reducing the risks created by the failure to replace reject poles in a timely manner.

The Osmose Turnkey Process

Why Choose Osmose?

- Osmose has the necessary experience and tools to execute design and oversee the pole replacement process, freeing up your engineering resources for mission critical, revenue-generating work.
- The Osmose team of centrally-located designers combined with our onsite technicians can more cost-effectively tackle the repetitive pole replacement design work.
- Outsourcing to Osmose helps to ensure that poles are replaced quickly and in the most cost-efficient manner.
