

# Pole Wrap™ : Combat Groundline Decay

## Product Description

Pole Wrap is a highly-effective preservative bandage designed to protect poles against decay at the critical groundline area. Pole Wrap contains a water soluble preservative that penetrates deeply into the wood. Pole Wrap's unique design makes for a dry, clean, easy-to-use bandage.

## Recommended Uses

- Relocated or reused poles
- New poles, especially those set in pavement
- Poles set in locations vulnerable to decay
- High-value installations
- Standing poles that have the groundline disturbed by grading or underground installations
- Poles stored for six months or more

## Installation

- Dig down to a depth of approximately 20 inches.
- Remove rotted wood from the area where the Pole Wrap will be applied.
- Inspect pole to assess its remaining serviceability.
- Clean the surface of the pole to be covered by Pole Wrap so it is free from dirt and debris.
- Measure the pole circumference and cut a section of Pole Wrap that will overlap approximately 3 to 4 inches.
- Apply Pole Wrap to the pole at a depth of approximately 18 inches, leaving remaining two inches above groundline (make sure the bandage is pulled tight and is in close contact with the wood).
- Secure Pole Wrap to the pole with staples, tacks or nails.
- Determine if Pole Wrap needs to be covered to avoid contact with children or livestock.
- Backfill the hole and tamp the earth around the pole to 2 inches above the original groundline.

**Important:** In areas where children or livestock may come in contact with Pole Wrap, proper installation includes covering any exposed product. Osmose Pasture Wrap is excellent for this purpose. Do not allow exposure of Pole Wrap above the groundline in these areas.

## Sizing & Ordering Information

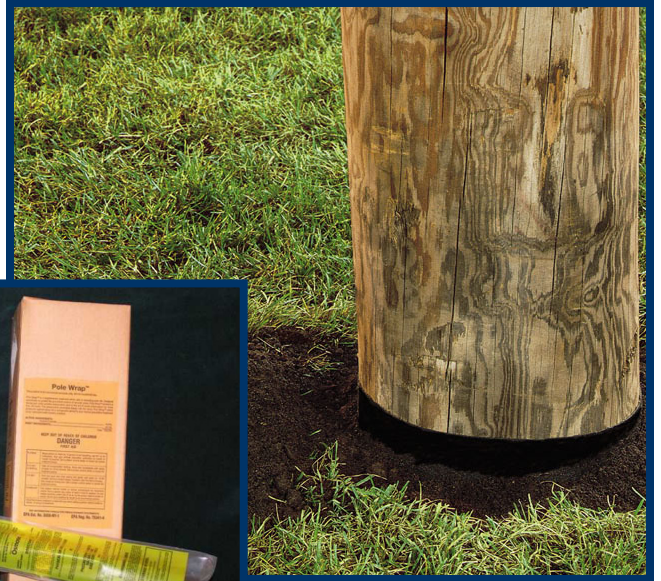

Pole Wrap is available as individual bandages or by the roll. Minimum order size is one box or one roll.

### Individual Bandages (20" wide)

Length	Number per Box
36" bandage	10
48" bandage	10
60" bandage	8

### Estimated Usage for Rolled Bandages (20" wide X 25' long)

Pole Circumference	Poles per Roll
30" pole	9
36" pole	7
48" pole	5 to 6
